<p>Note: The successful completion of the summative evaluation is mandatory to obtain the course credit.</p>	

ADDITIONAL NOTES:

Expectations

The expectations for music courses are organized into four distinct but related strands:

1. *Theory*. The study of theory involves learning the symbols, concepts, and conventions used in music. By completing the expectations, you will be able to converse and express yourself using appropriate musical terminology.

2. *Creation*. Creative work involves the practical application of performance skills and knowledge of theory as they relate to the performance medium, as well as composition. You will play, individually and in ensembles (e.g., using voice, band instruments or other performance media). You will improvise, interpret, and compose music, using a variety of media, including computers.

3. *Analysis*. Analysis involves listening to live or recorded performances to understand the language of music, its historical and cultural context, and how effectively its composers and performers communicate to their audience. The music analysed will be drawn from a range of cultures.

4. *Performance*. Proficiency on your instrument involves full comprehension and performance of written scores, accuracy in rhythm, tone, notation, articulation, posture and fingerings. A Variety of repertoire will be used in class to help you in developing all areas of performance.

Communication:

The **Desire2Learn** Learning Management System will be used for the purpose of teacher-peer communication. All written documentation handed in during the course will also be posted on the Desire2Learn. Every student will be able to log on to the website with their own personal username and password. Students are responsible to share their username and password with their parents, in order to inform them on the progress of the course regularly. Your user Id and password will be distributed to you in September.
